TECHNICAL DATA SHEET

## PRODUCT

## PART NUMBER

6 mil Multi-Surface .....	6MSB48
6 mil Carpet Cover .....	6CCB48

## PRODUCT DESCRIPTION

A Polyolefin film coated with a custom formulated, aqueous based acrylic adhesive incorporating proprietary technology. This product was designed to provide moderate to high adhesions to a variety of textured surfaces while maintaining clean removal properties. BearAcade products also allow for a more consistent peel adhesion over time due to the unique chemistry and formulation of the polymer. As with all Americover products, it is recommended that substrates be fully tested and approved for any potential application, to assure compatibility to a specific substrate and application parameters. (This product has also performed well on many other substrates not listed and needs to be fully tested and approved for compatibility to the substrate being masked.)

## PRODUCT USE & STORAGE

For best results products should be applied to a clean, dry surface.

The data listed above reflects the average values obtained in testing. Various other environmental conditions will vary the end user's actual results - temperature at time of application, pressure of lamination, surface material to be masked (glossy, matte or textured) and humidity. It is best for the purchaser to test the suitability of our products under their unique conditions.
