

Setting the standard for moisture control and facility protection since 1993

A photograph showing a person in a white protective suit and respirator working on a surface covered in mold. The person is using a tool to apply a white, sticky material to the mold. The background is a wall with various types of mold, including circular and irregular patches in shades of grey, black, and green. The person's suit is white and appears to be made of a heavy, protective material. The respirator is blue and black, covering the person's face. The overall scene is one of a mold remediation project.

BEARACADE[®] 6 MIL STICKY POLY

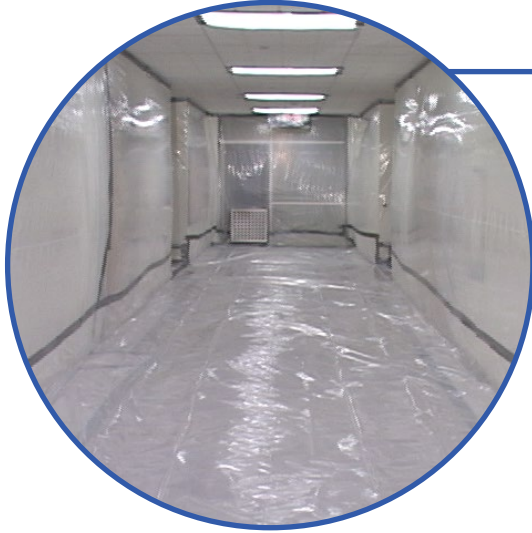

ABATEMENT AND REMEDIATION CONTAINMENT

TOTAL MOISTURE PROTECTION • MOLD & ASBESTOS CONTAINMENT • INCREASED JOB SAFETY

THE BEARACADE® WAY

ASBESTOS & MOLD ABATEMENT CONTAINMENT

The goal of creating containments is to isolate the work-space from the outside environment, allowing for the control and removal of harmful materials such as asbestos and mold. To achieve this goal, the containment must have the ability to create and maintain a sealed environment for the time to complete the work.

CONTAINMENT FAILURE WITH TAPE AND POLY

Current containments made from duct tape and poly film have failed to meet this requirement. They fail because the duct taped film releases from the wall, reducing or eliminating the negative pressure within the containment.

This creates the potential for:

- ▶ Particle release outside of the containment.
- ▶ Walls and floors, under negative pressure, “billow” out or up to distances of 2-3 feet creating loss of visual space.
- ▶ Workers must be careful to avoid cutting or tearing the “billowed” film with tools and equipment.
- ▶ The two layers of floor film not only “billow,” but are slippery. This can cause trip-falling and other safety concerns.
- ▶ Insurance rates reflect many of these hazards of building containments with the current method using duct tape and poly film.

THE AMERICOVER SOLUTION

After extensive testing in the field, we have made using BearAcade® easier than ever. Introducing Multi-Surface BearAcade®, a uniquely integrated adhesive system designed to adhere to almost every surface and allow a clean and easy release. Additionally, Carpet BearAcade® is made with a medium adhesive that adheres specifically to carpet. The film itself is made of a durable polyethylene resin blend for excellent containment. Both films are printed with the BearAcade® trademark to give installers confidence that the correct product has been selected for the surfaces. Multi-Surface adhesion product can be used on all surfaces including:

- | | | |
|--------------------------|------------------------------|-------------------------|
| ▶ Painted Plaster | ▶ Vinyl Floor Tile | ▶ Glass |
| ▶ Painted Sheetrock | ▶ Over Traditional Poly | ▶ Mirrors |
| ▶ Ceiling Lights | ▶ Ceiling Tile & Grid | ▶ Corkboard |
| ▶ Light Diffusers | ▶ Around Drums | ▶ Heating Vents |
| ▶ Unsealed Cement Floors | ▶ Lockers (Factory Finished) | ▶ Over Gaylords & Boxes |
| ▶ Sealed/Terrazo Floors | ▶ Finished Woodwork | ▶ Metal Door Frames |

THE BEARACADE® WAY

PRODUCT AT A GLANCE

“The BearAcade® Way” was developed and tested by abatement contractors to insure real world performance.

A new way of building containments has been developed to address both the quality and lower overall costs. New materials consisting of adhesives that are removable but have the holding power to provide containments that will not fail, and methods of building containments, including applicators that can deliver ten times the average square foot per man hour have been developed. This new system, “The BearAcade® Way” has provided some contractors the ability to double their business and deliver improved containments to their customers. “The BearAcade® Way” was developed and tested by abatement contractors to insure real world performance on the job.

- ▶ Hand or machine application; machine application results in a 10 fold increase in the average square feet per hour; significant increase (2 fold) in the average number of criticals per hour.
- ▶ Allows contractors to reduce overall costs, improve profits, and improve competitiveness to win more contracts.
- ▶ Does not fall from walls-stays up until the job is finished. No time lost reapplying a failed containment.
- ▶ Superior holding power. BearAcade® films are fully coated with an adhesive designed for abatement conditions.
- ▶ Can hold two times the negative pressure requirements for removal of asbestos.
- ▶ Eliminate “billowing” from wall and floors. Improves vision within the containment, eliminates accidental snagging of the billowing film with tools or equipment, and floors are less slippery than “billowed” floors.
- ▶ Improves clean up and vacuuming. Floor layers are bonded to each other resulting in a surface that is easily cleaned.
- ▶ Eliminates the need for spray adhesive primers during installation, and clean up of adhesive residue prior to repainting.
- ▶ Reduces damage to painted wallboard surfaces, reducing prep work prior to repainting.
- ▶ Superior seal quality of the overall containment. Fully coated sheets result in improved seal over the total containment. Conformance to asbestos abatement regulations.

***** Warning: Do not use on after-market tinted windows, acrylic sealers, or varnished wood surfaces.**

Warranty:

Americover Inc. warrants that the product will be free from defects in material and workmanship for a period of six months Buyer's receipt of the Product, and, in the event that this should occur, the product may be returned to Americover Inc. for replacement. Americover Inc. SHALL NOT BE LIABLE FOR INJURY, LOSS, OR DAMAGES, EITHER DIRECT OR CONSEQUENTIAL ARISING OUT OF THE USE OR INABILITY TO USE THE PRODUCT. IT IS THE RESPONSIBILITY OF THE BUYER OR USER TO DETERMINE THE SUITABILITY OF THE PRODUCT FOR THEIR INTENDED USE, AND THE PURCHASER AND/OR USER ASSUMES ALL RISKS AND LIABILITIES CONNECTED WITH THE USE OF THE PRODUCT. The warranty shall not apply to damage caused by disasters such as fire, flood and wind, or by actions or inaction's resulting in damage caused by misuse, mishandling, improper storage, or damage caused during shipping. THE WARRANTY SET FORTH IS IN LIEU OF ALL OTHER WARRANTIES OF ANY KIND WHATSOEVER, EXPRESS, IMPLIED, AND/OR STATUTORY, AND ALL SUCH OTHER WARRANTIES, INCLUDING BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE HEREBY DISCLAIMED.

THE AMERICOVER DIFFERENCE

Our deep and long-standing relationships with top-quality American manufacturers allow us to source and deliver products that are engineered to meet your specific needs.

We are an independent, privately-held company, which gives us the flexibility to design customized solutions on a case-by-case basis, going the extra mile to consistently meet and exceed your expectations. If we don't have it, we'll find it. If we can't find it, we'll have it made.

Here are just a few examples of other safety products we can source for you:

- ▶ 6 Mil Reinforced Plastic Sheeting
- ▶ NFPA Certified Fire Retardant Plastic Sheeting
- ▶ Antistatic Fire Retardant Plastic Sheeting

LEADING THE INDUSTRY FOR 25+ YEARS

Since 1993, Americover has been developing innovative, affordable solutions for air quality, moisture control and disaster mitigation. We have created some of the industry's most advanced products and technologies to help protect homes, occupants and job sites during the times you need it most.
