

PLASTIC SHEETING SOLUTIONS FOR PACKAGING & SHIPPING

TAILORED SOLUTIONS FOR YOU AND YOUR CUSTOMERS UNIQUE PROJECT NEEDS

Whether you are packing on site to fulfill shipments or supplying packaging materials, your customers rely on your expertise to protect their goods before, during, and after transport. We're here to make sure you have the right plastic sheeting solution to exceed those expectations.

CUSTOM SOLUTIONS FOR UNIQUE PROJECTS

Americover is a source to many industries who require polyethylene and plastic sheeting products that meet specific environmental and public safety regulations. We work with you and our manufacturing network to create a solution for you and your customer's unique projects.

PRODUCT CONFIGURATIONS AVAILABILITY

The following products can be customized to various specifications. If you are looking for a product solution that hasn't been listed, contact our knowledgeable team to discuss your project needs.

- ▶ String Reinforced Plastic Sheeting
- ▶ Self Adhesive Film
- ▶ Fire Retardant Plastic Sheeting
- ▶ Antistatic Bags and Film
- ▶ Heat Shrink Wrap Film
- ▶ Heavy Duty Liners: HDPE, LLDPE
- ▶ Corrugated Plastic Sheets
- ▶ Military Spec Packaging
- ▶ Specialty Tapes

STRING REINFORCED PLASTIC SHEETING

Product Features:

- ▶ Available in mil thicknesses ranging from 6 mil to 20 mil
- ▶ Stock color options include clear, white/white, black/white, and fire retardant white
- ▶ Outer layers contain UV inhibitors and thermal stabilizers to enhance outdoor life.
- ▶ String reinforced durability prevents rips and tears
- ▶ Stocked in roll lengths of 100 ft
- ▶ Short lead times on custom fabricated sizes

DURA-SKRIM®

Dura-Skrim® Reinforced Plastic Sheeting has a unique diamond pattern reinforcement layer placed between two layers of heavy duty polyethylene film. Widths start at 6 ft.

TUFF-SKRIM™

Tuff Scrim™ Reinforced Plastic Sheeting has a grid-like string reinforcement which enhances tear resistance. It's also available in an antistatic fire retardant version. Widths start at 4 ft.

Tuff Scrim™ is fully customizable to size and the accessory features below. You can have it custom fabricated to match exact dimensions, sketches, and designs.

DRAWSTRINGS	PIPE LOOPS	FASTEX 2" CLIPS	WEBBING LOOPS	CUSTOM NYLON ZIPPERS	GROMMETS/ INTERNAL TAB SEAMS	VELCRO	D-RINGS	SEWN HEMS/HEAT SEALED HEMS
-------------	------------	-----------------	---------------	----------------------	------------------------------------	--------	---------	-------------------------------

SELF ADHESIVE FILM

Americover Protective Films (also known as “maskings”) are designed to protect critical surfaces from marring, scratches and abrasions. They are designed to adhere to and protect a wide range of surface types during fabrication, assembly, shipping and storage.

FILM TYPES

- ▶ Polyethylene
 - » Low, Medium, High Density
 - » Linear Low Density
- ▶ Co-Extruded
 - » Black / White
 - » Custom Colors
- ▶ Polypropylene
 - » Heat Stable
- ▶ Low Gel Films

MANUFACTURING CAPABILITIES

- ▶ Custom Formulated Adhesive
- ▶ Roll Length: 50' - 15,000'
- ▶ Roll Width: 1" - 80"
- ▶ Perforations:
 - » Cross Direction: 2" - 120"
 - » Machine Direction: 1" - 79"
- ▶ Regular or Reverse Wound
- ▶ 9 Day Lead Time (standard products)
- ▶ Stock or Custom Samples

CLEAR	TINTED/COLORS	CO-EX UV FILMS	HEAT RESISTANT
			
PLASTIC CORES	STRIP COATING	PERFORATING	1 OR 2 COLOR PRINT
			

FIRE RETARDANT PLASTIC SHEETING

Fire retardant plastic sheeting is formulated with additives to interrupt the combustion process and self-extinguish unlike regular or non-fire retardant materials that continue to burn quickly even when the source has been extinguished. Americover offers an array of fire retardant plastic sheeting products that meet or exceed industry standards. Here is a list of product features for our fire retardant materials.

Scrim Reinforcement: When you need plastic sheeting to be light weight but extremely puncture and tear resistant you should consider something with scrim reinforcement. The polyester scrim is sandwiched between the layers of polyethylene to enhance the durability of the film.

Anti-static: Are you working with electricity or in a room with sensitive equipment? Anti-static films are recommended for applications where static electricity discharge could harm electronics like computer systems, appliances and machinery. Anti-static is ideal for clean rooms and data centers.

Anti-slip/Anti-skid: Functional floor protection doesn't just prevent scratching and staining, it also prevents accidents due to slipping. Anti-slip and anti-skid makes this feature beneficial for use on Navy ships, in hospital corridors, and many other applications.

Self-Adhesive: Sometimes you just need the plastic to stay where you put it. Our Self-adhesive fire retardant carpet cover is made with a non-transferring, water-based adhesive.

Light Blocking with Carbon Composite: Is privacy an issue? Maybe it isn't but you have to cover materials sensitive to light. Black fire retardant plastic sheeting can block light and people from seeing what is behind or underneath the film itself.

Biaxial heat shrinking: Heat shrinking is great when you need to protect something up to two years. The plastic will conform to the object you are protecting to create a second skin. When properly installed, it can prevent rust and corrosion, and protection from the elements.

Printed or Non-Printed: If the fire marshal or inspector requires your plastic sheeting to clearly state what standards it meets, we have pre-printed rolls stocked and ready to ship.

Tapes: It seems only natural to pair fire retardant plastic sheeting with fire retardant tapes. We offer fire retardant tapes that adhere to a variety of substrates such as steel and plastic.

CUSTOM FITTED BAGS

Custom Fitted Bags can be made to size in various color options including orange, clear, and anti-static pink. Anti-static bags are used to minimize static electricity and damage from electrostatic discharge (ESD). Bags are sold by the case. Case volume varies by size.

NO TOOLS NEEDED FOR INSTALLATION

Custom Fitted Bags are designed to be installed by stretching the elastic band over the object you want to protect. There is no need for tape, screws, or nylon ties to secure the bag.

COMMON APPLICATIONS

- ▶ Kiosk covers to prevent dust build-up and contamination during renovations.
- ▶ Duct Covers for unfinished ends to prevent moisture, dirt particles, dust and debris from entering the air handling system.
- ▶ Turnstile Covers to minimize static electricity and prevent dust and debris from entering electrical components.

HEAT SHRINK WRAP FILM

Product Features:

- ▶ Biaxle shrinking to create weather-tight containments
- ▶ Thicknesses range from 6 mil - 12 mil
- ▶ Wide selection of roll sizes
- ▶ Color options include clear, white, and blue
- ▶ Available in fire retardant, non-fire retardant, and UVI for full exposure up to 2 years

Don't forget these tools and accessories to make your job easier.

HEAVY DUTY LINERS

Americover proudly supplies heavy duty liners manufactured and fabricated in the U.S. with no minimum on stock or fabricated rolls. Heavy Duty Liners can be used to line or cover just about anything, from pallets to crates, and storage containers.

HDPE & LLDPE LINER

For heavy duty applications that require chemical, water, and weather resistance, you should consider using HDPE (High Density Polyethylene) and LLDPE (Low Linear Density Polyethylene). These materials can be used as slip sheets on top of pallets or a separation layer between rows of goods.

CORRUGATED PLASTIC SHEETS

Corrugated Plastic Sheets offer versatile protection for a wide variety of applications. It's a cost-effective solution for creating containers, signs, slip sheets, and other packaging materials. Corrugated plastic sheets are easy to handle, reusable, and fully customizable. Americover will work with you to design and create a product that meets your specifications.

CORREX® BOARD

Correx® Board combines all of the top qualities of corrugated plastic sheets with flame retardant protection. It's available with anti-static, custom print and custom designed die-cut.

COROPLAST®

Coroplast® is strong, lightweight, and waterproof. It has a range of customization capabilities from color, size, and graphics to ESD packaging.

MILITARY SPECIFICATION PACKAGING

We are your source for Military Specification Packaging, which has gone through the requirements to meet the stringent standards of the US Military. For long-term storage and moisture protection, use Mil-Spec Packaging.

HIGH QUALITY MATERIALS

We have access to a large inventory of ready-made bags manufactured with materials such as Film Foil, ESD, Poly Mylar, and more. We offer these materials in slit widths, sheets, and bag form.

UNIQUE PRODUCT FEATURES

- ▶ Packaging protection from moisture, heat, freezing cold, rust, corrosion, and other damaging elements.
- ▶ Volatile corrosion inhibitor technology blocks oxygen and moisture from damaging different types of metal components.
- ▶ Anti-static protection to prevent damage as a result of built-up electrostatic discharge.

THE AMERICOVER DIFFERENCE

Our deep and long-standing relationships with top-quality American manufacturers allow us to source and deliver products that are engineered to meet your specific needs. Because we are an independent, privately-held company, we have the flexibility to design customized solutions for our customers on a case-by-case basis, going the extra mile to consistently meet and exceed expectations. If we don't have it, we'll find it or have it made.

AN INDUSTRY LEADER

Since 1993, Americover has developed affordable solutions for air quality, moisture control, and mitigation for disaster preparation, recovery and restoration. We have provided advanced technology products that are designed to help protect homes, occupants, job sites, and more during a time when you need it most.
