

RAPID WALL COVER™

PRODUCT DESCRIPTION

Rapid Wall Cover is a quick, inexpensive solution for light duty protection any time you need it. The 2" strip of medium tack painter's tape is pre-attached to poly sheeting to make installation and clean up faster than ever. The treated poly sheeting "clings" to any surface and attracts paint overspray to prevent damage. You can use Rapid Wall Cover to protect walls, wallpaper, doors, windows, furniture, appliances, office equipment and so much more during construction and remodeling.

PRODUCT FEATURES

- ▶ The 2" blue tape strip has a perfect edge for fast and precise installation
- ▶ Rapid Wall Cover can easily be re-positioned
- ▶ The pre-attached poly unfolds and clings to surfaces even in windy conditions
- ▶ Available in a convenient roll size of 10' x 100'

**SAVING TIME MEANS SAVING MONEY!
RAPID WALL COVER™ PROTECTS WALLS IN SECONDS!**

Turn the page to see how easy it is to install.

Install in 3 Easy Steps

1

Unroll while smoothing the tape to the wall or surface you are protecting.

2

Cut the plastic from roll and unfold the layers.

3

Rapid Wall Cover™ will now cling to the wall or surface once unfolded!

Rapid Wall Cover™ “CLINGS” to almost any surface. This unique characteristic makes this non-adhesive film an excellent choice for covering many things. Used mostly for light-duty protection, it will not damage walls, wallpaper, doors, windows, furniture, appliances, or office equipment. The cling feature actually “anchors” paint overspray to the film, leaving less mess. One edge of the film has a 2” tape strip that holds the film in place on walls, making it fast and easy to install. Can be installed with the taped edge at the ceiling or baseboard. Inexpensive, quick protection!
